SOCIAL DETERMINANTS OF HEALTH

According to the Centers for Disease Control, "conditions in the places where people live, learn, work, and play affect a wide range of health risks and outcomes. These conditions are known as social determinants of health (SDOH). To reduce quality of life, disparities and improve health outcomes in our only what happens inside the healthcare delivery system."

Improving Social Determinants of Health

Improving Social Determinants of Health

MAKING PROGRESS THROUGH COLLECTIVE IMPACT

Significant social problems cannot be solved by a single organization. There is not just one solution for improving the social determinants of health of an entire neighborhood or community. Doing so requires establishing a culture of multi-sector collaboration for collective impact.

1. A county-wide **COMMUNITY** health needs assessment and improvement plan
2. Improved **CONNECTIONS** between healthcare and community development professionals
3. Continuous **COMMUNICATION** via broadly represented stakeholder groups
4. Productive **COORDINATION** through the "Invest Health" planning grant from Robert Wood Johnson Foundation and Reinvestment Fund
5. Solid **CONSENSUS** around a pipeline of projects targeting social determinants of health

INVEST IN MCLEAN COUNTY HEALTH

ASSESSMENT AND PLANNING

County Health Department, Advocate BroMenn Medical Center, OSF HealthCare, and United Way of McLean County formed an Executive Steering Committee to conduct a county-wide joint community health assessment and corresponding community health improvement plan. For the first time, McLean County would have a single health assessment and health plan, rather than four. The joint assessment and plan intentionally examined zip code data, in addition to county-wide data, emphasizing geographic and racial disparities.

1. Establish the Executive Steering Committee and McLean County Community Health Council (April 2015)
2. Analyze primary and secondary data (2015-2016)
3. Select the top three health needs for McLean County using the Hanlon Method (February 2016)
4. Publish the 2016 McLean County Community Health Needs Assessment (August 2016)
5. Convene large stakeholder groups to write goals and objectives for each of the three top health needs (2016-2017)
6. Publish the 2017-2019 McLean County Community Health Improvement Plan (February 2017)

INVEST IN MCLEAN COUNTY HEALTH

TOP HEALTH CONCERNS FOR MCLEAN COUNTY RESIDENTS:

Based on preliminary analysis of both primary and secondary data, the McLean County Executive Steering Committee identified 13 top health concerns from the Community Health Needs Assessment:

1. ALZHEIMER'S AND DEMENTIA
2. BIRTH OUTCOMES
3. CANCER
4. CAESAREAN SECTION
5. HEART DISEASE
6. MENTAL HEALTH
7. OBESITY
8. ORAL HEALTH
9. RADON
10. RESPIRATORY DISEASE
11. TRANSMITTED DISEASES
12. VIOLENCE ABUSE
13. VIOLENCE ABUSE

The Executive Steering Committee brought these 13 concerns to the full McLean County Community Health Council, which consolidated and renamed some of the needs and narrowed the list down to the top six issues:

1. ACCESS TO APPROPRIATE HEALTHCARE FOR THE UNDERSERVED AND AREAS OF HIGH SOCIOECONOMIC NEEDS
2. BEHAVIORAL HEALTH (MENTAL HEALTH + SUBSTANCE ABUSE)
3. BIRTH OUTCOMES
4. OBESITY
5. ORAL HEALTH
6. RESPIRATORY DISEASE
